The draft individual and consolidated financial statements for the year ended 30 June 2016 will be approved on 21 September 2016. Such documents will be included in the Annual Financial Report which will be made available to the public pursuant to art. 154 *ter* of the Italian Financial Services Act.

At a consolidated level, the financial year ended 30 June 2016, which have been affected by significant market turmoil for at least three of the four quarters, delivered a net profit of EUR 604.5 million, higher than the EUR 589.8 million reported last year, due to a good performance by the banking activities and to broad business diversification.

Revenues were stable at an all-time level of EUR 2,046.6 million, on a higher contribution from the retail and consumer business (EUR 1,116.9 million against EUR 1,008 million), which absorbed the reduction of the wholesale banking (from EUR 643.6 million to EUR 496.9 million), this sector having been hit harder by the substantial reduction in interest rates and the reduced business volumes.

The distinctive feature of the twelve months under review was the further improvement in asset quality accompanied by a significant reduction in the cost of risk (down 21.4%, from EUR 532.7 million to EUR 418.9 million), in consumer banking in particular.

Furthermore, the capital soundness aspects have been confirmed, as witnessed by the positive results of the stress test.

In relation to Mediobanca S.p.A., the financial year ended 30 June 2016 recorded a net profit of EUR 288 million, below the EUR 333 million recorded last year on account in particular of the EUR 81.8 million transferred to the Bank Resolution Fund, the majority of which in the form of one-off contribution, which offset the higher gains realised on disposals of securities (up from EUR 123.4 million to EUR 141.4 million, EUR 41.6 million of which deriving from the sale of the Assicurazioni Generali shares) and the reduction in loan loss provisions (from EUR 74.2 million to EUR 29.5 million). Revenues were down 14.6%, from EUR 752.6 million to EUR 642.5 million.

The Board of Directors has adopted a proposal to pay a gross dividend of EUR 0.27 per share, to be submitted to the approval of shareholders at the general meeting to be held on 28 October 2016.

Section D – Risks

Element	Description of Element	Disclosure requirement
D.2	Key risks specific to the Issuer(s)	<p>There are certain factors that may affect the Issuer's ability to fulfil its obligations under Securities issued under the Programme. These include the following risk factors related to the Mediobanca Group, its operations and its industry:</p> <ol style="list-style-type: none"> 1. The general economic conditions, the performance of financial markets, interest rate levels, currency exchange rates, changes in laws and regulation, changes in the policies of central banks, particularly the Bank of Italy and the European Central Bank, and competitive factors can change the level of demand for the Issuer's products and services, the credit quality of borrowers and counterparties, the interest rate margin of the Issuers between lending and borrowing costs and the value of each of the Issuer's investment and trading portfolios. 2. The European sovereign debt crisis may adversely affect the Issuer's results of operations, business and financial conditions. 3. The Mediobanca Group has exposure to European sovereign debt. 4. Fluctuations in interest and exchange rates may affect each Issuer's results. 5. The financial results of the Issuer may be affected by general economic, financial and other business conditions. 6. The credit and capital markets have been experiencing extreme volatility and disruption in recent months. 7. Each of the Issuer's investment banking revenues, in the form of financial advisory and debt and equity underwriting fees, are directly related to the number and size of the transactions in which

the Issuer participates and may be impacted by continued or further credit market dislocations or sustained market downturns.

8. In some of the businesses of each Issuer, protracted adverse market movements, particularly asset price declines, can reduce the level of activity in the market or reduce market liquidity.
9. In recent months, international and domestic markets experienced extreme volatility and disruption. If extreme volatility and disruption continue in the future, the Issuers' liquidity can be adversely affected.
10. If the Issuer is unable to continue to respond to the competitive environment in Italy with attractive product and service offerings that are profitable for the Issuers, it may lose market share in important areas of its business or incur losses on some or all of its activities.
11. If existing or potential customers believe that the Issuer' risk management policies and procedures are inadequate, the Issuer's reputation, and to a certain extent its revenues and profits, may be negatively affected.
12. Each of the Issuers, like all financial institutions, is exposed to many types of operational risk, including the risk of fraud by employees and outsiders, unauthorised transactions by employees or operational errors, including errors resulting from faulty computer or telecommunication systems.
13. Systemic risk could adversely affect the businesses of the Issuer.
14. The investors should note that the portfolio of the Issuer contains so-called "over the counter" (OTC) derivatives. If the financial condition of market counterparties or their perceived creditworthiness deteriorates further, the Mediobanca Group may record further credit valuation adjustments on the underlying instruments insured by such parties.
15. A downgrade of Mediobanca's rating may limit Mediobanca's opportunities to extend mortgage loans and may have a particularly adverse effect on Mediobanca's image as a participant in the capital markets, as well as in the eyes of its clients.
16. Changes in the Italian and European regulatory framework could adversely affect the business of the Issuer.
17. Each of the Issuers may be subject to increased capital requirements.
18. The price or value of a Securityholder's investment in Securities and/or the ability of Mediobanca to satisfy its obligations under

		<p>the Securities may be affected by the finalization and implementation of the Crisis Management Directive.</p>
<p>D.6</p>	<p>Key risks specific to the securities</p>	<p>In addition, there are certain factors which are material for the purpose of assessing the risks related to the Securities.</p> <p>General</p> <p>(i) The Securities may not be a suitable investment for all investors. Investors should be aware that they may lose the value of their entire investment or part of it, as the case may be.</p> <p>(ii) An investment in the Securities, which are linked to the Reference Items, may entail significant risks not associated with investments in conventional securities such as debt or equity securities. Set out below is a description of the most common risks.</p> <p>Risks related to the structure of a specific issue of Securities</p> <p>(i) The Securities involve a high degree of risk, which may include, among others, interest rate, foreign exchange, time value and political risks. Investors should be prepared to sustain a partial or total loss of the purchase price of the Securities.</p> <p>(ii) Certain general risk factors related to the Securities referencing a Reference Item, including that the market price of the Securities may be volatile; that investors may receive no remuneration; that investors may lose all or a substantial portion of their principal in case of non-capital guaranteed Securities; that the Reference Items may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other securities or indices; that the timing of changes in a Reference Item may affect the actual yield to investors, even if the average level is consistent with their expectations; and Securities are of limited maturity and, unlike direct investments in a share, index, currency, debt instrument, fund, commodity or other asset, investors are not able to hold Securities beyond the Settlement Date in the expectation of a recovery in the price of the underlying.</p> <p>(iii) The Cash Settlement Amount at any time prior to expiration is typically expected to be less than the trading price of such Securities at that time. The trading price may differ from the Cash Settlement in spite of Trading costs for the Securities.</p> <p>(iv) Prospective investors intending to purchase Securities to hedge against the market risk associated with investing in the Reference Item should recognise the complexities of utilising Securities in this manner.</p>
