What are the key risks that are specific to the Issuer?

The Issuer and Mediobanca Group is subject to the following key risks:

- The operations, earnings capacity and the stability of the sector of both the Issuer and the Mediobanca Group may be influenced by its credit standing, the general economic situation of Italy and the entire Eurozone, trends on financial markets and the economic, social and financial consequences generated by the Russia/Ukraine conflict. With reference to financial markets, the solidity, resilience and growth prospects of the economies of the countries in which the Issuer operates in particular will be especially important. The macroeconomic scenario is currently marked by considerable uncertainty in relation to: (a) Russian-Ukrainian conflict and recent developments in the Israeli-Palestinian conflict; (b) the long-term consequences of the health crisis due to the Covid-19 pandemic; (c) the possible joint actions by the main rating agencies; and (d) the recent crisis in the international banking system, combined with restrictions imposed by jurisdictions to reduce persistent inflationary pressures have led to a slowdown in global growth. In relation to point (a) above, persistence of uncertainties linked to the Russian-Ukrainian conflict continue to generate strong tensions on the energy and commodities markets. With reference to the Israeli-Palestinian conflict, the continuation and/or worsening of the crisis between the Palestinian and Israeli governments could lead to the emergence of a further profile of uncertainty with possible macroeconomic and market consequences. In relation to point (b) above, in the 2022/2023 financial year, global economic growth was influenced by the Chinese government's decision to abandon the zero-tolerance policy towards Covid infections. China's decision in the latter part of the first half of the year reversed the global economy's loss of momentum and helped restore its momentum. In relation to point (c) above, any joint actions by the main rating agencies which result in an assessment of the creditworthiness of the Republic of Italy below the level of investment grade, may have a negative impact on the income statement, balance sheet and financial position of Mediobanca and/or the Group. In relation to point (d) above, in the last part of the financial year, the combination of the turbulence in the US and Swiss banking sectors and the emergence of the economic effects of monetary restrictions led to a slowdown in the growth of economic activity and a de-synchronization of economic cycles between the economic areas of North America, the European continent and the Far East. Hence, as of the date of the Base Prospectus, the ongoing downward trend in the growth estimates for macroeconomic indicators, such as inflation, employment and private consumption indicators, coupled with the increase in volatility on financial markets, risks creating adverse repercussions on the earnings, capital and financial situation of the Issuer and/or on the Group.
- The business activities of both Mediobanca and the Group and their earnings and financial solidity depend also on the credit standing of their respective clients and counterparties. Mediobanca is exposed to the risks traditionally associated with credit activity. Accordingly, breach by its customers of contracts entered into and their own obligations, or the possible failure to provide information or the provisions of incorrect information by them regarding their respective financial and credit situation, could impact negatively on the earnings, capital and/or financial situation of Mediobanca;

- As at 30 June 2023, the Issuers' capability to implement the actions and to meet the targets to be reached (the "Plan Objectives") contained in its 2023-26 Strategic Plan depends on a number of circumstances, some of which are beyond the Issuer's control, including, but not limited to, the macroeconomic scenario, which could be compromised by the consequences deriving from the Russia/Ukraine conflict, the changes in the regulatory framework, and the effects of specific actions or concerning future events which the Issuers are only partially able to influence. Furthermore, there is no certainty that the actions provided for in the Strategic Plan will result in the benefits expected from implementation of the Plan Objectives; if such benefits fail to materialize, the results expected by the Mediobanca may differ, even materially, from those envisaged in the Strategic Plan;
- The Issuer is subject to market risk, defined as the risk of the loss of value of the financial instruments, including sovereign debt securities, held by the Issuer as a result of movements in market variables (including, but not limited to, interest rates, stock market prices and/or exchange rates) or other factors that could trigger a deterioration in the capital solidity of the Issuer and/or the Group. The financial year ended at 30 June 2023 has been characterized by a persistent volatility across all asset classes, especially interest rates, due primarily to the macroeconomic context, which has been characterised by a high inflation rate for the principal Western economies;
- The Group is exposed to different types of operational risk. The event types most impacted by operational risk are originated by products sold to clients, commercial practices, the execution of operating processes, and frauds committed from outside the Group. Although the Mediobanca Group has adopted a system for recording, assessing and monitoring operational risks with a view to preventing and containing them, it should be noted that unpredictable events or events otherwise beyond the control of the Issuer could occur, which could impact negatively on the Issuer's and the Group's operating results, activities and earnings, capital and/or financial situation, as well as on their reputation.

Rights attached to the Securities

The product offers the total protection of the Notional Amount per Security under the occurrence of certain conditions, therefore the investor might incur in a capital loss of 100 per cent. of the Notional Amount.

This product is linked to the performance of the Underlying and is designed to provide, to the occurrence of certain conditions: i) at maturity date, a cash settlement amount equal to 100 per cent. of the Notional Amount per Securities, ii) on predetermined dates, a conditional remuneration, with a memory effect unless an automatic early redemption event occurs.

In particular, on the Settlement Date, the redemption amount will be determined on the Settlement Valuation Date as follows:

a) if the Performance of the Underlying is greater than or equal to the Barrier Level, the investor will receive a cash settlement amount equal to 100 per cent. of the Notional Amount per Security;

b) if the Performance of the Underlying is less than the Barrier Level, the investor will be entitled to receive a physical delivery of the Underlying to be intended as a number of shares determined by dividing (i) 100 per cent. of the Notional Amount per Security and (ii) the Initial Reference Level of the Underlying. The value of such shares will depend on the performance of the Underlying on the Settlement Date. If, as a result of the calculation, fractions of shares of the Underlying are determined, investors will receive a residual cash settlement amount equal to the value of the fraction of the share on the Settlement Valuation Date. In this case, the value of the shares allotted, and the residual cash settlement amount might be less than the amount invested, therefore, investors would incur in a partial or total loss of the Notional Amount per Security.

Furthermore, the product offers a Conditional Remuneration on the relevant Conditional Remuneration Payment Dates, if the Performance of the Underlying is greater than or equal to the Conditional Remuneration Payment Level on the relevant Conditional Remuneration Valuation Date. If this condition occurs, the product pays an amount equal to the sum of the Conditional Remunerations not paid on the preceding Conditional Remuneration Payment Dates (memory effect). Otherwise, investors will not receive any Conditional Remuneration.

If an Automatic Early Settlement Event occurs, the product will be early redeemed and investors will receive, on the relevant Automatic Early Settlement Date, a settlement amount equal to 100 per cent of Notional Amount per Security. If an Automatic Early Settlement Event occurs, the product early redeemed and no other payments will be paid to the investors.

Any restrictions on the free transferability of the Securities: there are restrictions on sales of the Securities into, amongst other jurisdictions, the United States, the European Economic Area (including Italy), the United Kingdom and Japan.

Where will the Securities be traded?

The Issuer reserves the right to make further applications for the Securities to be admitted to listing and/or trading on additional markets/trading venues.

What are the key risks that are specific to the Securities?

The Securities are subject to the following key risks:

General

- The Securities may not be a suitable investment for all investors. Investors should be aware that they may lose the value of their entire investment or part of it, as the case may be. An investment in the Securities, which are linked to the Underlying References, may entail significant risks not associated with investments in conventional securities such as debt or equity securities. Set out below is a description of the most common risks.

Risks related to the structure of a particular issue of Securities

- The Securities involve a high degree of risk, which may include, among others, interest rate, foreign exchange, time value and political risks. Investors should be prepared to sustain a partial or total loss of the subscription or purchase price of the Securities. Certain general risk factors related to the Securities referencing an Underlying Reference, including that the market price of the

Securities may be volatile; that investors may receive no remuneration; that investors may lose all or a substantial portion of their principal in case of non-capital guaranteed Securities; that the Underlying References may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other securities or indices; that the timing of changes in an Underlying Reference may affect the actual yield to investors, even if the average level is consistent with their expectations;; and Securities are of limited maturity and, unlike direct investments in a share, investors are not able to hold Securities beyond the Settlement Date in the expectation of a recovery in the price of the underlying.

- The Issuer may, but is not obliged to, list or ask for admission to trading of Securities on a stock exchange or a trading venue. If the Securities are listed or admitted to trading on any stock exchange or trading venue, there can be no assurance that at a later date, the Securities will not be delisted or that trading on such stock exchange or trading venue will not be suspended. The Issuer or any of its Affiliates may, but is not obliged to, be a market-maker for an issue of Securities. However, during certain periods, it may be difficult, impractical or impossible for the entity acting as market-maker to quote bid and offer prices. Even if the relevant Issuer or such other entity is a market-maker for an issue of Securities, the secondary market for such Securities may be limited.
- The Cash Settlement Amount and the value of the Entitlement less the Exercise Price (the "Physical Settlement Value") at any time prior to expiration is typically expected to be less than the trading price of such Securities at that time. The difference between the trading price, the Cash Settlement Amount, the Physical Settlement Value, will reflect, among other things, a "time value" for the Securities;
- With respect to physically settled Securities, the Calculation Agent may determine that a settlement disruption event or a failure to deliver due to illiquidity occurred. Any such determination may affect the value of the Securities and/or may delay settlement and/or lead to cash settlement rather than physical settlement in respect of the Securities;
- The Securities include an automatic early settlement feature. The longer the time remaining until the scheduled settlement date of the Securities, the higher the probability that an automatic early settlement event will occur.

Considerations Associated with specific types of Securities

- Risks associated with Multiple Final Payout - Reverse Convertible Securities: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s) and the application of a knock-in event occurs and automatic early settlement features.

Risks relating to Underlying Reference Asset(s)

- In addition, there are specific risks in relation to Securities which are linked to an Underlying Reference (including Hybrid Securities) and an investment in such Securities will entail significant risks not associated with an investment in a conventional debt security. Risk factors in relation to Underlying Reference linked Securities include exposure to one or more share, similar market risks to a direct equity investment, global depositary receipt ("GDR") or American depositary receipt ("ADR"), potential adjustment events or extraordinary events affecting shares and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities.
- The occurrence of an additional disruption event or optional additional disruption event may lead to an adjustment to the Securities early settlement or may result in the amount payable on scheduled settlement being different from the amount expected to be paid at scheduled settlement and consequently the occurrence of an additional disruption event and/or optional additional disruption event may have an adverse effect on the value or liquidity of the Securities.
- Settlement may be postponed following the occurrence or existence of a Settlement Disruption Event and, in these circumstances, the Issuer may pay a Disruption Cash Settlement Price (which may be less than the fair market value of the Entitlement) in lieu of delivering the Entitlement.
