SUMMARY OF THE SPECIFIC ISSUE

Summaries are made up of disclosure requirements known as Elements." These elements are numbered in Sections A - E (A.1 - E.7).

This summary contains all the Elements required to be included in a summary for this type of securities and issuer. Because some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements.

Even though an Element may be required to be inserted in the summary because of the type of securities and issuer, it is possible that no relevant information can be given regarding the Element. In this case a short description of the Element is included in the summary with the mention of 'hot applicable."

The Securities have terms and conditions relating to, among other matters: **C.8** Descripti Status of on rights The Securities are issued by the Issuer on an unsubordinated basis. and The Securities will constitute direct, unconditional, unsubordinated and unsecured obligations of the Issuer and will rank *pari passu* among themselves and (save for certain obligations required to be preferred by law) ranking equally with all other unsecured obligations other than unsubordinated obligations, if any, of the Issuer from time to time outstanding. Payments in respect of Securities in global form All payments in respect of Securities represented by a Global Security will be made against presentation for endorsement and, if no further payment falls to be made in respect of the Securities, surrender of that Global Security to or to the order of the Fiscal Agent or such other Paying Agent as shall have been notified to the Securityholders for such purpose. A record of each payment so made will be endorsed on each Global Security, which endorsement will be *prima facie* evidence that such payment has been made in respect of the Securities. Payments in respect of Securities in definitive form All payments in respect of the Securities in definitive form shall be made against presentation and surrender of the relevant Securities at the specified office of any Paying Agent outside the United States by a cheque payable in the currency in which such payment is due drawn on, or, at the option of the holder, by transfer to an account denominated in that currency with a bank in the principal financial centre of that currency; provided that in the case of Euro, the transfer may be to a Euro account. Payments in respect of Securities in dematerialised form All payments in respect of Securities in dematerialised form shall be made through an electronic book-entry system managed by Monte Titoli S.p.A. or any other centralised custodian appointed by the Issuer. **Illegality and force majeure** If the Issuer determines that the performance of its obligations under the Securities or that any arrangements made to hedge the Issuer's obligations under the Securities have become (i) illegal in whole or in part for any reason, or (ii) by reason of a force majeure event (such as an act of God, fire, flood, severe weather conditions, or a labour dispute or shortage) or an act of state, impossible or impracticable the Issuer may settle the Securities by giving notice to Securityholders. Further issues and consolidation The Issuer may from time to time without the consent of the Securityholders create and issue further Securities so as to be consolidated with and form a single series with the outstanding Securities. Substitution Subject to the fulfilment of certain conditions, Mediobanca may at any time (subject to certain conditions as provided in the Terms and Conditions) without the consent of the Securityholders, substitute Mediobanca International, or any other third party entity as Issuer in place of Mediobanca.

the The Securities may not be a suitable investment for all investors. Investors should be aware that they may securitie lose the value of their entire investment.

> An investment in the Securities, which are linked to the Underlying References, may entail significant risks not associated with investments in conventional securities such as debt or equity securities. Set out below is a description of the most common risks.

Risks related to the structure of a specific issue of Securities

- The Securities involve a high degree of risk, which may include, among others, interest rate, foreign exchange, time value and political risks. Investors should be prepared to sustain a partial or total loss of the subscription or purchase price of the Securities.
- Certain general risk factors related to the Securities referencing an Underlying Reference, including that the market price of the Securities may be volatile; that investors may receive no remuneration; that investors may lose all or a substantial portion of their principal in case of noncapital guaranteed Securities; that the Underlying References may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other securities or indices; that the timing of changes in an Underlying Reference may affect the actual yield to investors, even if the average level is consistent with their expectations; and Securities are of limited maturity and, unlike direct investments in an index, investors are not able to hold Securities beyond the Settlement Date in the expectation of a recovery in the price of the underlying.
- An active secondary market may never be established or may be illiquid and this may adversely affect the value at which an investor may sell its Securities (investors may suffer a partial or total loss of the amount of their investment).
- The Issuer may, but is not obliged to, list or ask for admission to trading of Securities on a stock exchange or a trading venue. If the Securities are listed or admitted to trading on any stock

MEDIOBANCA Banca di Credite Tinanziario S.p.S.

exchange or trading venue, there can be no assurance that at a later date, the Securities will not be delisted or that trading on such stock exchange or trading venue will not be suspended.

- The Issuer or any of its Affiliates may, but is not obliged to, be a market-maker for an issue of Securities. However, during certain periods, it may be difficult, impractical or impossible for the entity acting as market-maker to quote bid and offer prices.
- To the extent that an issue of Securities becomes illiquid, an investor may have to wait until the Exercise Date to realise value.
- Securities are unsecured obligations;
- The Cash Settlement Amount at any time prior to expiration is typically expected to be less than the trading price of such Securities at that time. The difference between the trading price and the Cash Settlement Amount, will reflect, among other things, a "time value" for the Securities.
- The meetings of Securityholders provisions permit defined majorities to bind all Securityholders;
- In certain circumstances Securityholders may lose the entire value of their investment;
- The Terms and Conditions of the Securities also provide that the Fiscal Agent and the Issuer may, without the consent of Securityholders, agree to certain modifications to the conditions of the Securities.
- The Securities may have a minimum trading amount and if, following the transfer of any Securities, a Securityholder holds fewer Securities than the specified minimum trading amount, such Securityholder will not be permitted to transfer their remaining Securities prior to settlement without first purchasing enough additional Securities in order to hold the minimum trading amount;
- Prospective investors intending to purchase Securities to hedge against the market risk associated with investing in the Underlying Reference(s) should recognise the complexities of utilising Securities in this manner.
- The terms of the Securities contain no negative pledge, and the Issuer is not prohibited from incurring additional debt.
- There are no events of default under the Securities.
- Expenses and taxation may be payable in respect of the Securities.
- It is not possible to predict whether the taxation regime applicable to Securities on the date of purchase or subscription will be amended during the term of the Securities.
- The Terms and Conditions of the Securities are based on English law in effect as at the date of this Base Prospectus. No assurance can be given as to the impact of any possible judicial decision or change to English law or administrative practice after the date of this Base Prospectus.
- The risks associated with the Securities being represented by one or more Global Securities, which will be deposited with a common depositary for Euroclear and Clearstream, Luxembourg.
- If the Issuer determines that its performance under any Securities has, or that any arrangements made to hedge the Issuer's obligations under any Securities have become, (i) illegal in whole or in part for any reason, or (ii) by reason of a force majeure event (such as an act of God, fire, flood, severe weather conditions, or a labour dispute or shortage) or an act of state, impossible or impracticable, the Issuer may settle such Securities.
- The Issuer will not provide post-issuance information in relation to the Underlying Reference.

MEDIOBANCA Banca di Credite Tinanziarie Sp. S.

- The risks associated with it being impossible to know the amount of the Securities in circulation on the date of issue.
- The issuance of further tranches of Securities could have a negative impact on the price of the Securities.
- Some of the terms of the Securities are not known at the issue date as they will be determined on the Strike Date. Following the Strike Date, the Issuer will give notice of the actual terms. Prospective investors should review the Final Terms together with the information contained in the notice in order to ascertain the actual terms of the Securities.

Considerations Associated with specific types of Securities

Risks associated with Multiple Final Payout - Reverse Convertible Securities

Investors may be exposed to a total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s) and the application of knock-out features.

Risks relating to Underlying Reference Asset(s)

In addition, there are specific risks in relation to Securities which are linked to an Underlying Reference (including Hybrid Securities) and an investment in such Securities will entail significant risks not associated with an investment in a conventional debt security. Risk factors in relation to Underlying Reference linked Securities include:

- exposure to one or more index, adjustment events and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities.
- The occurrence of an additional disruption event or optional additional disruption event may lead to an adjustment to the Securities early settlement or may result in the amount payable on scheduled settlement being different from the amount expected to be paid at scheduled settlement and consequently the occurrence of an additional disruption event and/or optional additional disruption event may have an adverse effect on the value or liquidity of the Securities.
- Certain risks related to the remuneration applicable to the Securities.

Risks related to the market generally

- The investment activities of certain investors are subject to legal investment laws and regulations, or review or regulation by certain authorities.
- Certain specific information will not be known at the beginning of an offer period as they will be fixed by the end of the offer period. Prospective investors will be required to make their investment decision based on the indicative range rather than the actual data.
- Issue price and offer price of the Securities include structuring fees and placement fees. The placement fees shall be paid by the Issuer to the Distributor. Any such fees may not be taken into account for the purposes of determining the price of such Securities on the secondary market and could result in a difference between the original issue price and/or offer price, the theoretical value of the Securities, and/or the actual bid/offer price quoted by any intermediary in the secondary market.

Certain considerations associated with public offers of Securities

- The Issuer and the Distributor have the right under certain conditions to withdraw the offer in relation to the Securities, which in such circumstances will be deemed to be null and void. Investors who have already paid or delivered subscription monies for the relevant Securities will be entitled to reimbursement of such amounts, but will not receive any compensation that may have accrued in the period between their payment or delivery of subscription monies and the reimbursement of such amounts.
 - The early closing of the offer may have an impact on the aggregate number of Securities issued

MEDIOBANCA Banca di Credite Tinanziario Sp. 1.

and, therefore, may have an adverse effect on the liquidity of the Securities.

- The Issuer and the Distributor will have the right to extend the offer period and/or to postpone the originally designated issue date, and related interest payment dates and the maturity date.
- The effectiveness of the offer of Securities is conditional upon admission to trading on EuroTLX, occurring by the Issue Date.
- The Issuer will use all reasonable endeavours to maintain the listing of the Securities, provided that if it becomes impracticable or unduly burdensome or unduly onerous to maintain such listing, then the Issuer may apply to de-list the relevant Securities.
