## General

The Securities may not be a suitable investment for all investors. Investors should be aware that they may lose the value of their entire investment.

An investment in the Securities, which are linked to the Underlying References, may entail significant risks not associated with investments in conventional securities such as debt or equity securities. Set out below is a description of the most common risks.

### **Risks related to the structure of a specific issue of Securities**

The Securities involve a high degree of risk, which may include, among others, interest rate, foreign exchange, time value and political risks. Investors should be prepared to sustain a partial or total loss of the subscription or purchase price of the Securities.

Certain general risk factors related to the Securities referencing an Underlying Reference, including that the market price of the Securities may be volatile; that investors may receive no remuneration; that investors may lose all or a substantial portion of their principal in case of non-capital guaranteed Securities; that the Underlying References may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other securities or indices; that the timing of changes in an Underlying Reference may affect the actual yield to investors, even if the average level is consistent with their expectations; and Securities are of limited maturity and, unlike direct investments in an index, investors are not able to hold Securities beyond the Settlement Date in the expectation of a recovery in the price of the underlying.

An active secondary market may never be established or may be illiquid and this may adversely affect the value at which an investor may sell its Securities (investors may suffer a partial or total loss of the amount of their investment).

The Issuer may, but is not obliged to, list or ask for admission to trading of Securities on a stock exchange or a trading venue. If the Securities are listed or admitted to trading on any stock exchange or trading venue, there can be no assurance that at a later date, the Securities will not be delisted or that trading on such stock exchange or trading venue will not be suspended.

The Issuer or any of its Affiliates may, but is not obliged to, be a market-maker for an issue of Securities. However, during certain periods, it may be difficult, impractical or impossible for the entity acting as market-maker to quote bid and offer prices.

Securities are unsecured obligations;

The Cash Settlement Amount at any time prior to expiration is typically expected to be less than the trading price of such Securities at that time. The difference between the trading price and the Cash Settlement Amount, will reflect, among other things, a "time value" for the Securities.

The meetings of Securityholders provisions permit defined majorities to bind all Securityholders;

In certain circumstances Securityholders may lose the entire value of their investment;

The Terms and Conditions of the Securities also provide that the Fiscal Agent and the relevant Issuer may, without the consent of Securityholders, agree to certain modifications to the conditions of the Securities.

The Securities may have a minimum trading amount and if, following the transfer of any Securities, a Securityholder holds fewer Securities than the specified minimum trading amount, such Securityholder will

not be permitted to transfer their remaining Securities prior to settlement without first purchasing enough additional Securities in order to hold the minimum trading amount;

Prospective investors intending to purchase Securities to hedge against the market risk associated with investing in the Underlying Reference(s) should recognise the complexities of utilising Securities in this manner.

The terms of the Securities contain no negative pledge, and the Issuer is not prohibited from incurring additional debt.

There are no events of default under the Securities

Expenses and taxation may be payable in respect of the Securities.

It is not possible to predict whether the taxation regime applicable to Securities on the date of purchase or subscription will be amended during the term of the Securities.

The Terms and Conditions of the Securities are based on English law in effect as at the date of this Base Prospectus, except for the status provisions applicable to the Securities and the contractual recognition of bail-in powers provisions, and any non contractual obligations arising out of or in connection with such provisions, which shall be governed by, and construed in accordance with, Italian law. No assurance can be given as to the impact of any possible judicial decision or change to English law or administrative practice after the date of this Base Prospectus.

The risks associated with the Securities being represented by one or more Global Securities, which will be deposited with a common depository for Euroclear and Clearstream, Luxembourg.

If the Issuer determines that its performance under any Securities has, or that any arrangements made to hedge the relevant Issuer's obligations under any Securities have become, (i) illegal in whole or in part for any reason, or (ii) by reason of a force majeure event (such as an act of God, fire, flood, severe weather conditions, or a labour dispute or shortage) or an act of state, impossible or impracticable, the relevant Issuer may settle such Securities.

The Issuer will not provide post-issuance information in relation to the Underlying Reference.

The issuance of further tranches of Securities could have a negative impact on the price of the Securities.

Some of the terms of the Securities are not known at the issue date as they will be determined on the Strike Date. Following the Strike Date, the Issuer will give notice of the actual terms. Prospective investors should review the Final Terms together with the information contained in the notice in order to ascertain the actual terms of the Securities.

## **Considerations Associated with specific types of Securities**

Risks associated with Multiple Final Payout - Reverse Convertible Securities

Investors may be exposed to a total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s) and the application of knock-in features.

## **Risks relating to Underlying Reference Asset(s)**

In addition, there are specific risks in relation to Securities which are linked to an Underlying Reference
