Section D – Risks

Element	Description of	Disclosure requirement
----------------	-----------------------	-------------------------------

	Element	
D.2	Key risks specific to the Issuer	<p>There are certain factors that may affect each Issuer's ability to fulfil its obligations under Securities issued under the Programme. These include the following risk factors related to the Mediobanca Group, its operations and its industry:</p> <ul style="list-style-type: none"> (i) The general economic conditions, the performance of financial markets, interest rate levels, currency exchange rates, changes in laws and regulation, changes in the policies of central banks, particularly the Bank of Italy and the European Central Bank, and competitive factors can change the level of demand for the Issuer's products and services, the credit quality of borrowers and counterparties, the interest rate margin of the Issuer between lending and borrowing costs and the value of each of the Issuer's investment and trading portfolios. (ii) The European sovereign debt crisis has adversely affected, and may continue to adversely affect, the Issuer's results of operations, business and financial conditions. (iii) The Mediobanca Group has exposure to Eurozone sovereign debt. (iv) Fluctuations in interest and exchange rates may affect the Issuer's results. (v) The results of the Issuer are affected by general economic, financial and other business conditions. (vi) The credit and capital markets have been experiencing extreme volatility and disruption in recent months. (vii) Each of the Issuer's investment banking revenues, in the form of financial advisory and debt and equity underwriting fees, are directly related to the number and size of the transactions in which the Issuer participates and may be impacted by continued or further credit market dislocations or sustained market downturns. (viii) In some of each Issuer's businesses, protracted adverse market movements, particularly asset price declines, can reduce the level of activity in the market or reduce market liquidity. (ix) In the event that the extreme volatility and disruption experienced by international and domestic markets in recent months continue in the future, the Issuer's liquidity can be adversely affected. (x) If the Issuer is unable to continue to respond to the competitive environment in Italy with attractive product and service offerings that are profitable for the Issuer, it may lose market share in important areas of its business or incur losses on some or all of its activities. (xi) If existing or potential customers believe that the Issuer's risk management policies and procedures are inadequate, the Issuer's reputation as well as its revenues and profits may be negatively affected. (xii) The Issuer, like all financial institutions, is exposed to many types of operational risk, including the risk of fraud by employees and outsiders, unauthorised transactions by employees or operational errors, including errors resulting from faulty computer or telecommunication systems. (xiii) Systemic risk could adversely affect the Issuer's businesses. (xiv) The investors should note that the portfolio of the Issuer contains so- called "over the counter"

		<p>(OTC) derivatives. If the financial condition of market counterparties or their perceived creditworthiness deteriorates further, the Group may record further credit valuation adjustments on the underlying instruments insured by such parties.</p> <p>(xv) A downgrade of Mediobanca’s rating may limit Mediobanca’s opportunities to extend mortgage loans and may have a particularly adverse effect on Mediobanca’s image as a participant in the capital markets, as well as in the eyes of its clients.</p> <p>(xvi) Changes in the Italian and European regulatory framework could adversely affect the Issuer’s business.</p> <p>(xvii) The guarantee given by the Guarantor is capped at 110 per cent. of the aggregate notional amount of any Tranche of the Securities and 110 per cent. of the remuneration on such securities due but not paid.</p>
<p>D.6</p>	<p>Key risks specific to the securities</p>	<p>In addition, there are certain factors which are material for the purpose of assessing the risks related to the Securities.</p> <p>General</p> <p>The Securities may not be a suitable investment for all investors. Investors should be aware that they may lose the value of their entire investment.</p> <p>An investment in the Securities, which are linked to the Underlying References, may entail significant risks not associated with investments in conventional securities such as debt or equity securities. Set out below is a description of the most common risks.</p> <p>Risks related to the structure of a specific issue of Securities</p> <ul style="list-style-type: none"> • The Securities involve a high degree of risk, which may include, among others, interest rate, foreign exchange, time value and political risks. Investors should be prepared to sustain a partial or total loss of the subscription or purchase price of the Securities. • Certain general risk factors related to the Securities referencing an Underlying Reference, including that the market price of the Securities may be volatile; that investors may receive no remuneration; that investors may lose all or a substantial portion of their principal in case of non-capital guaranteed Securities; that the Underlying References may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other securities or indices; that the timing of changes in an Underlying Reference may affect the actual yield to investors, even if the average level is consistent with their expectations; and Securities are of limited maturity and, unlike direct investments in an index, investors are not able to hold Securities beyond the Settlement Date in the expectation of a recovery in the price of the underlying. • An active secondary market may never be established or may be illiquid and this may adversely affect the value at which an investor may sell its Securities (investors may suffer a partial or total loss of the amount of their investment). • The Issuer may, but is not obliged to, list or ask for admission to trading of Securities on a stock exchange or a trading venue. If the Securities are listed or admitted to trading on any stock exchange or trading venue, there can be no assurance that at a later date, the Securities will not be delisted or that trading on such stock exchange or trading venue will not be suspended. • The Issuer or any of its Affiliates may, but is not obliged to, be a market-maker for an issue of Securities. However, during certain periods, it may be difficult, impractical or impossible for the entity

Banca di Credito Finanziario S.p.A.

acting as market-maker to quote bid and offer prices.

- Securities are unsecured obligations.
- The Cash Settlement Amount at any time prior to expiration is typically expected to be less than the trading price of such Securities at that time. The difference between the trading price and the Cash Settlement Amount, will reflect, among other things, a "time value" for the Securities.
- The meetings of Securityholders provisions permit defined majorities to bind all Securityholders.
- In certain circumstances Securityholders may lose the entire value of their investment.
- The Terms and Conditions of the Securities also provide that the Fiscal Agent and the Issuer may, without the consent of Securityholders, agree to certain modifications to the conditions of the Securities.
- The Securities may have a minimum trading amount and if, following the transfer of any Securities, a Securityholder holds fewer Securities than the specified minimum trading amount, such Securityholder will not be permitted to transfer their remaining Securities prior to settlement without first purchasing enough additional Securities in order to hold the minimum trading amount.
- Prospective investors intending to purchase Securities to hedge against the market risk associated with investing in the Underlying Reference(s) should recognise the complexities of utilising Securities in this manner.
- The terms of the Securities contain no negative pledge, and the Issuer is not prohibited from incurring additional debt.
- There are no events of default under the Securities.
- Expenses and taxation may be payable in respect of the Securities.
- It is not possible to predict whether the taxation regime applicable to Securities on the date of purchase or subscription will be amended during the term of the Securities.
- The Terms and Conditions of the Securities are based on English law in effect as at the date of this Base Prospectus, except for the status provisions applicable to the Securities and the contractual recognition of bail-in powers provisions, and any non contractual obligations arising out of or in connection with such provisions, which shall be governed by, and constructed in accordance with Italian Law. No assurance can be given as to the impact of any possible judicial decision or change to English law or administrative practice after the date of this Base Prospectus.
- The risks associated with the Securities being represented by one or more Global Securities, which will be deposited with a common depository for Euroclear and Clearstream, Luxembourg.
- If the Issuer determines that its performance under any Securities has, or that any arrangements made to hedge the Issuer's obligations under any Securities have become, (i) illegal in whole or in part for any reason, or (ii) by reason of a force majeure event (such as an act of God, fire, flood, severe weather conditions, or a labour dispute or shortage) or an act of state, impossible or impracticable, the Issuer may settle such Securities.
- The Issuer will not provide post-issuance information in relation to the Underlying Reference.
- The risks associated with it being impossible to know the amount of the Securities in circulation on the

date of issue.

- The issuance of further tranches of Securities could have a negative impact on the price of the Securities.
- Some of the terms of the Securities are not known at the issue date as they will be determined on the Strike Date. Following the Strike Date, the Issuer will give notice of the actual terms. Prospective investors should review the Final Terms together with the information contained in the notice in order to ascertain the actual terms of the Securities.
- Risks associated with Administrator/Benchmark Event.

Considerations Associated with specific types of Securities

Risks associated with Multiple Final Payout – 1-Way Cap Securities

Investors may be exposed to a partial of their investment. The return on the Securities depends on the performance of the Underlying Reference.

Risks relating to Underlying Reference Asset

In addition, there are specific risks in relation to Securities which are linked to an Underlying Reference (including Hybrid Securities) and an investment in such Securities will entail significant risks not associated with an investment in a conventional debt security. Risk factors in relation to Underlying Reference linked Securities include:

- exposure to one or more index, adjustment events and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities;
- the occurrence of an additional disruption event or optional additional disruption event may lead to an adjustment to the Securities early settlement or may result in the amount payable on scheduled settlement being different from the amount expected to be paid at scheduled settlement and consequently the occurrence of an additional disruption event and/or optional additional disruption event may have an adverse effect on the value or liquidity of the Securities.

Risks related to the market generally

- The investment activities of certain investors are subject to legal investment laws and regulations, or review or regulation by certain authorities.
- Certain specific information will not be known at the beginning of an offer period as they will be fixed by the end of the offer period. Prospective investors will be required to make their investment decision based on the indicative range rather than the actual data.
- Issue price and offer price of the Securities include structuring fees and placement fees. The placement fees shall be paid by the Issuer to the Distributor. Any such fees may not be taken into account for the purposes of determining the price of such Securities on the secondary market and could result in a difference between the original issue price and/or offer price, the theoretical value of the Securities, and/or the actual bid/offer price quoted by any intermediary in the secondary market.

Certain considerations associated with public offers of Securities

- The Issuer, acting also as Distributor, has the right under certain conditions to withdraw the offer in relation to the Securities, which in such circumstances will be deemed to be null and void. Investors who have already paid or delivered subscription monies for the relevant Securities will be entitled to reimbursement of such amounts, but will not receive any compensation that may have accrued in the

		<p>period between their payment or delivery of subscription monies and the reimbursement of such amounts.</p> <ul style="list-style-type: none"> • The early closing of the offer may have an impact on the aggregate number of Securities issued and, therefore, may have an adverse effect on the liquidity of the Securities. • The Issuer, acting also as Distributor, will have the right to extend the offer period and/or to postpone the originally designated issue date, and related interest payment dates and the maturity date. • The effectiveness of the offer of Securities is conditional upon admission to trading on EuroTLX, occurring by the Issue Date. • The Issuer will use all reasonable endeavours to maintain the listing of the Securities, provided that if it becomes impracticable or unduly burdensome or unduly onerous to maintain such listing, then the Issuer may apply to de-list the relevant Securities.
