### What are the key risks that are specific to the Issuer?

The Issuer and Mediobanca Group is subject to the following key risks:

- the occurrence of particular events and/or potential changes in the markets, due to fluctuations in interest rates, exchange rates and currencies, stock market and commodities prices and credit spreads and/or other risks relating to the regulatory developments in the prudential requirements field, could lead to adverse effects on the activities and on the economic/financial position of the Issuer.
- In the event that the extreme volatility and disruption experienced by international and domestic markets in recent months continue in the future, the Issuer's liquidity can be adversely affected.
- Market tensions might affect negatively the funding costs and economic outlook of some euro member countries. This, together with the risk that some countries (even if not very significant in terms of gross domestic product) might leave the euro area, would adversely affect the Group's ability to fund its financial obligations at a competitive cost.
- A downgrade of Mediobanca's rating (for whatever reason) might result in higher funding and refinancing costs for Mediobanca in the capital markets. In addition, a downgrade of Mediobanca's rating may limit Mediobanca's opportunities to extend mortgage loans and may have a particularly adverse effect on Mediobanca's image as a participant in the capital markets, as well as in the eyes of its clients.
- The Issuer's operations are dependent on the correct functioning of its IT systems, which exposes the Issuer to risks with regard to the reliability of the system (disaster recovery), the quality and integrity of the data managed and the threats to which IT systems are subject, as well as physiological risks related to the management of software changes (change management), which could have negative effects on the Issuers' business, results of operations or financial condition.

**Rights attached to the Securities**

The product offers the total protection of the Notional Amount per Securities under the occurrence of certain conditions, therefore the investor might incur in a capital loss of 100 per cent. of the Notional Amount.

This product is linked to the performance of the Reference Underlying and is designed to correspond, to the occurrence of certain conditions:

i) at maturity date, a cash settlement amount equal to 100 per cent. of the Notional Amount per Securities and, ii) on specific dates, a conditional remuneration with a memory effect and an unconditional remuneration, unless automatic early redemption Event occurs.

In particular, on the Settlement Date, the redemption amount will be determined on the Final Valuation Date as follows:

a) if the worst Performance of the Underlying Reference(s) is greater than or equal to the Barrier Level, investors will receive a cash settlement amount equal to 100 per cent. of the Notional Amount per Securities;

b) if the worst Performance of the Underlying Reference(s) is less than the Barrier Level, investors will receive a cash settlement amount equal to 100 per cent. of the Notional Amount per Security multiplied by the worst Performance of the Underlying References and the Participation Factor. In this case, investors would incur in a partial or total loss of the amount invested.

The product pays in addition:

i) a Conditional Remuneration, on the relevant Conditional Remuneration Payment Date, if the worst Performance of the Underlying References is greater than or equal to the Conditional Remuneration Payment Level on the relevant Conditional Remuneration Valuation Date. Otherwise, investors will not receive any Conditional Remuneration.

ii) an Unconditional Remuneration, on the relevant Unconditional Remuneration Payment Date.

If an Automatic Early Settlement Event occurs, the product expires and will be early redeemed and investors will receive, the fifth business day following the Automatic Early Settlement Valuation Date, a redemption amount equal to 100 per cent of Notional Amount per Security.

If an Automatic Early Settlement Event occurs, the product early redeems and no other payments will be corresponded to the investors.

The Issuer reserves the right to make further applications for the Securities to be admitted to listing and/or trading on additional markets/trading venues.

#### What are the key risks that are specific to the Securities?

The Securities are subject to the following key risks:

##### General

- The Securities may not be a suitable investment for all investors. Investors should be aware that they may lose the value of their entire investment or part of it, as the case may be. An investment in the Securities, which are linked to the Underlying References, may entail significant risks not associated with investments in conventional securities such as debt or equity securities. Set out below is a description of the most common risks.

##### Risks related to the structure of a specific issue of Securities

- The Securities involve a high degree of risk, which may include, among others, interest rate, foreign exchange, time value and political risks. Investors should be prepared to sustain a partial or total loss of the subscription or purchase price of the Securities. Certain general risk factors related to the Securities referencing an Underlying Reference, including that the market price of the Securities may be volatile; that investors may receive no remuneration; that investors may lose all or a substantial portion of their principal in case of non-capital guaranteed Securities; that the Underlying References may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other securities or indices; that the timing of changes in an Underlying Reference may affect the actual yield to investors, even if the average level is consistent with their expectations; and Securities are of limited maturity and, unlike direct investments in an index, investors are not able to hold Securities beyond the Settlement Date in the expectation of a recovery in the price of the underlying.
- The Issuer may, but is not obliged to, list or ask for admission to trading of Securities on a stock exchange or a trading venue. If the Securities are listed or admitted to trading on any stock exchange or trading venue, there can be no assurance that at a later date, the Securities will not be delisted or that trading on such stock exchange or trading venue will not be suspended. The Issuer or any of its

Affiliates may, but is not obliged to, be a market-maker for an issue of Securities. However, during certain periods, it may be difficult, impractical or impossible for the entity acting as market-maker to quote bid and offer prices. Even if the relevant Issuer or such other entity is a market-maker for an issue of Securities, the secondary market for such Securities may be limited.

- The occurrence of an Administrator/Benchmark Event may lead to early settlement or adjustment of the Securities, which may include selecting one or more successor benchmarks and making related adjustments to the Securities, including, if applicable to reflect increased costs. An Administrator/Benchmark Event may arise if any of the following circumstances occurs or will occur: (1) a benchmark is materially changed or permanently cancelled, or (2) (i) the relevant authorisation, registration, recognition, endorsement, equivalence decision or approval in respect of the benchmark or the administrator or sponsor of the benchmark is not obtained, (ii) an application for authorisation, registration, recognition, endorsement, equivalence decision, approval or inclusion in any official register is rejected or (iii) any authorisation, registration, recognition, endorsement, equivalence decision or approval is suspended or inclusion in any official register is withdrawn.

#### **Considerations Associated with specific types of Securities**

- Risks associated with Multiple Final Payout - Reverse Convertible Securities

Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s) and the application of a knock-in event occurs.

In addition, the value of the Securities and the amount that Securityholders receive upon an Automatic Early Settlement may not correlate with the value of the Underlying Reference, which may trigger such Automatic Early Settlement.

#### **Risks relating to Underlying Reference Asset(s)**

- In addition, there are specific risks in relation to Securities which are linked to an Underlying Reference (including Hybrid Securities) and an investment in such Securities will entail significant risks not associated with an investment in a conventional debt security. Risk factors in relation to Underlying Reference linked Securities include:

exposure to one or more index, adjustment events and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities.

- The occurrence of an additional disruption event or optional additional disruption event may lead to an adjustment to the Securities early settlement or may result in the amount payable on scheduled settlement being different from the amount expected to be paid at scheduled settlement and consequently the occurrence of an additional disruption event and/or optional additional disruption event may have an adverse effect on the value or liquidity of the Securities.

#### **Risks related to the market generally**

- Certain specific information will not be known at the beginning of an offer period as they will be fixed by the end of the offer period. Prospective investors will be required to make their investment decision based on the indicative range rather than the actual data.
- Issue price of the Securities include placement fees and structuring fees. The placement fees shall be paid by the Issuer to the Distributor. Any such fees may not be taken into account for the purposes of determining the price of such Securities on the secondary market and could result in a difference between the original issue price, the theoretical value of the Securities, and/or the actual bid/offer price quoted by any intermediary in the secondary market.

#### **Certain considerations associated with public offers of Securities**

- The Issuer has the right under certain conditions to withdraw the offer in relation to the Securities, which in such circumstances will be deemed to be null and void. Investors who have already paid or delivered subscription monies for the relevant Securities will be entitled to reimbursement of such amounts, but will not receive any compensation that may have accrued in the period between their payment or delivery of subscription monies and the reimbursement of such amounts.
