What are the key risks that are specific to the Issuer?

The Issuer and Mediobanca Group is subject to the following key risks:

- The evolution of the macroeconomic scenario could negatively affect the economic and financial situation of the Issuer and/or of the Mediobanca Group, and in particular its liquidity, profitability and capital solidity, leading the Issuer and/or the Mediobanca Group to incur losses, increase the cost of financing and reduce the value of assets held. The Issuer's performance is also influenced by the general economic situation, both national and for the Eurozone as a whole, and by the trend on financial markets, in particular by the solidity and growth prospects of the geographical areas in which the Issuer operate. The macroeconomic scenario currently reflects considerable areas of uncertainty, in relation to: (a) the trends in the real economy with reference to the prospects of recovery and growth in the national economy and/or resilience of growth in the economies of those countries, such as the United States and China, which have delivered growth, even substantial, in recent years; (b) future developments in the monetary policy of the European Central Bank for the Eurozone area, and the U.S. Federal Reserve Board for the US dollar area, and the policies implemented by various countries to devalue their own currencies for competitive reasons; (c) the sustainability of the sovereign debt of certain countries, and the tensions noted more or less frequently on financial markets. In this respect, the outbreak of Covid-19 pandemic, which began in China at the end of January 2020 and expanded globally in a few months, has had and is still having significant negative consequences on the overall scenario and in turn on the Italian banking sector in which the Issuer operates. Furthermore, the measures implemented by the competent authorities, and mainly the Italian Government, on the one side, helped facing the health emergency, while on the other had massive negative consequences in human, social and economic terms. Indeed, such measures led to a reduction in revenues on the majority of the corporate customers, an increase of costs related to the actions necessary to contain and prevent the spread of Covid-19 and, in turn, on the ability to pay existing debt (potentially also vis-à-vis the Issuer) and on current employment levels. Any of such circumstances may have an impact on the Issuer's results and, in turn, on the Issuer's ability to pay remuneration or repay principal repayment amount under the Securities. Despite the actions taken so far by the Italian government, the regulatory bodies of the European Union and the relevant member states to mitigate the negative impacts of the anti-Covid-19 measures and support the economic recovery (including the adoption of the recovery plan named "NextGenerationEU"), significant uncertainties still remain about the evolution, severity and duration of the pandemic. Should the Covid-19 pandemic and the consequent economic crisis situation persist in the forthcoming months, further negative impacts may arise on the Issuer's business situation, also due to the fact that such crisis situation increase the materiality of most of the risks to which the Issuer is exposed to, which are detailed below, and in turn the Group's results and financial condition might be materially adversely affected. In addition, the Russia-Ukraine war started in February 2022 with the invasion of Ukraine by Russia. The extent of the consequences of this war with regard to energy price increases and inflation as a whole on the one hand and trade restrictions and sanctions on the other hand, but also counterreactions and the duration of such a conflict are not foreseeable at this time. This conflict could have significant adverse effects on European economy, the inflation and the stability of international financial markets.
- Fluctuations in interest rates in Italy and in the other markets in which the Mediobanca Group operates influence the Mediobanca Group's performance. The results of each Issuer's banking operations are affected by its management of interest rate sensitivity (i.e. Interest rate sensitivity refers to the relationship between changes in market interest rates and changes in net interest income). A mismatch of interest-earning assets and interest-bearing liabilities in any given period, which tends to accompany changes in interest rates, may have a material effect on the Issuer's financial condition or results of operations.
- The results of the Issuer may be affected by general economic, financial and other business conditions. The risk arising from the impact of the economy and business climate on the credit quality of the Issuer's borrowers and counterparties, including sovereign states, can affect the overall credit quality and the recoverability of loans and amounts due from counterparties. The Issuer is

therefore exposed by its very nature to potential changes in the value of financial instruments, including securities issued by sovereign states, due to fluctuations in interest rates, exchange rates and currencies, stock market and commodities prices and credit spreads, and/or other risks.

- The credit and capital markets have been experiencing extreme volatility and disruption in recent months. To the extent that any of the instruments and strategies the Issuer use to hedge or otherwise manage their exposure to credit or capital markets risk are not effective, the Issuer may not be able to mitigate effectively their risk exposures in particular market environments or against particular types of risk. The Issuer's trading revenues and interest rate risk are dependent upon their ability to identify properly, and mark to market, changes in the value of financial instruments.
- The Issuer's investment banking revenues, in the form of financial advisory and debt and equity underwriting fees, are directly related to the number and size of the transactions in which the Issuer participate and may be impacted by continued or further credit market dislocations or sustained market downturns. Sustained market downturns or continued or further credit market dislocations and liquidity issues would also likely lead to a decline in the volume of capital market transactions that the Issuer executes for its clients and, therefore, to a decline in the revenues that it receives from commissions and spreads earned from the trades the Issuer executes for its clients. In addition, particularly during market downturns, the Issuer may face additional expenses defending or pursuing claims or litigation related to counterparty or client defaults.

Rights attached to the Securities

The product offers the total protection of the Notional Amount per Securities under the occurrence of certain conditions, therefore the investor might incur in a capital loss of 100 per cent. of the Notional Amount.

This product is linked to the credit risk of the Reference Entity and is designed to correspond, to the occurrence of certain conditions: i) at the settlement date, a cash settlement amount equal to 100 per cent. of the Notional Amount per Securities and, ii) on specific dates, fixed remuneration amounts, unless a Credit Event on the Reference Entity occurs.

In particular, on the Settlement Date, the product will provide a cash settlement amount equal to 100 per cent. of the Notional Amount per Security. Furthermore, the product will correspond, on the relevant Remuneration Payment Date, fixed remuneration amounts at the Fixed Rate. The fixed remuneration amounts are calculated by multiplying the Notional Amount per Securities, the relevant Fixed Rate and the relevant Day Count Fraction.

If, during the Credit Event Observation Period, a Credit Event on the Reference Entity occurs, the product will be settled early on the Auction Settlement Date and it will correspond an Auction Settlement Amount. In this case, investors would incur in a partial or total loss of the amount invested. Furthermore, the product will not correspond any remuneration amount with reference to the remuneration period following the last Remuneration Payment Date (excluded) immediately preceding the Credit Event. If an Auction Settlement Amount cannot be determined, investors will receive a Deliverable Obligation in lieu of the payment of the cash settlement amount.

The Reference Entity may be substituted by one or more Reference Entity(ies) in case of particular events occur (such as, in case of an incorporation of the Reference Entity in another entity). Investors would expose to the Credit Event on the successor Reference Entity.

What are the key risks that are specific to the Securities?

The Securities are subject to the following key risks:

General

- The Securities may not be a suitable investment for all investors. Investors should be aware that they may lose the value of their entire investment or part of it, as the case may be. An investment in the Securities, which are linked to the Underlying References, may entail significant risks not associated with investments in conventional securities such as debt or equity securities. Set out below is a description of the most common risks.

Risks related to the structure of a specific issue of Securities

- The Securities involve a high degree of risk, which may include, among others, interest rate, foreign exchange, time value and political risks. Investors should be prepared to sustain a partial or total loss of the subscription or purchase price of the Securities. Certain general risk factors related to the Securities referencing an Underlying Reference, including that the market price of the Securities may be volatile; that investors may receive no remuneration; that investors may lose all or a substantial portion of their principal in case of non-capital guaranteed Securities; that the Underlying References may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other securities or indices; that the timing of changes in an Underlying Reference may affect the actual yield to investors, even if the average level is consistent with their expectations;; and Securities are of limited maturity and, unlike direct investments in a share, investors are not able to hold Securities beyond the Settlement Date in the expectation of a recovery in the price of the underlying.
- The Issuer may, but is not obliged to, list or ask for admission to trading of Securities on a stock exchange or a trading venue. If the Securities are listed or admitted to trading on any stock exchange or trading venue, there can be no assurance that at a later date, the Securities will not be delisted or that trading on such stock exchange or trading venue will not be suspended. The Issuer or any of its Affiliates may, but is not obliged to, be a market-maker for an issue of Securities. However, during certain periods, it may be difficult, impractical or impossible for the entity acting as market-maker to quote bid and offer prices. Even if the relevant Issuer or such other entity is a market-maker for an issue of Securities, the secondary market for such Securities may be limited.
- In case certain events, indicated in the terms and conditions and the relevant final terms, occurs with reference to the relevant Underlying Reference(s) or the Securities, the Calculation Agent and the Issuer have broad discretion to make certain determinations to account for such event(s) including to (i) make adjustments to the terms of the Securities and/or (ii) cause early settlement of the Securities, any of which determinations may have an adverse effect on the value of the Securities. The effects of coronavirus pandemic (such as the measures taken by governments and authorities in this respect) may cause the occurrence of the

events indicated above and involve such adjustments to the terms of the Securities and/or early settlement of the Securities.

- The Terms and Conditions of the Securities are based on English law in effect as at the date of the Base Prospectus, except for the status provisions applicable to the Securities and the contractual recognition of bail-in powers provisions, and any non contractual obligations arising out of or in connection with such provisions, which shall be governed by, and construed in accordance with, Italian law. No assurance can be given as to the impact of any possible judicial decision or change to English law or administrative practice after the date of the Base Prospectus.

Risks relating to Underlying Reference Asset(s)

- The occurrence of an additional disruption event or optional additional disruption event may lead to an adjustment to the Securities early settlement or may result in the amount payable on scheduled settlement being different from the amount expected to be paid at scheduled settlement and consequently the occurrence of an additional disruption event and/or optional additional disruption event may have an adverse effect on the value or liquidity of the Securities. In addition, the value of the Securities and the amount that Securityholders receive upon an Automatic Early Settlement may not correlate with the value of the Underlying Reference, which may trigger such Automatic Early Settlement.
- In addition to the credit risk of the Issuer, payments on the Securities are subject to the credit risk of the Reference Entity to which they are linked. Holders may lose their entire amount of principal invested and may not receive any payments of remuneration if Event Determination Dates occur. The financial condition and creditworthiness of a Reference Entity may change over time. Public information which is available in relation to a Reference Entity may be incomplete, misleading or out of date. The identity of each Reference Entity is subject to amendment as a result of corporate or other actions such as a merger or demerger. The risks associated with successor Reference Entity may be greater than the risks associated with the original Reference Entity. The credit risk to investors may further be increased if the Reference Entity and the Issuer are concentrated in a particular industry sector or geographic area, or if they have exposure to similar financial or other risks. Holders will have no claim against any Reference Entity and no interest in or rights under any obligation of a Reference Entity. An investment in the Securities is not equivalent to an investment in the obligations of a Reference Entity. The occurrence of a credit securities additional disruption event or a merger event may result in the Securities being settled prior to the Scheduled Settlement Date at their fair market value which may be an amount which is less than the outstanding notional amount of the Securities. Where settlement of the Securities following a Credit Event is determined by reference to a credit derivatives auction, the outcome of such auction may be affected by technical factors or operational errors or may be subject to actual or attempted manipulation, which may result in a lower payment to Holders. Where settlement is determined by reference to bid quotations sought by the Calculation Agent from third party dealers, the Calculation Agent will be entitled to seek quotations for eligible obligations of the relevant Reference Entity having the lowest possible market value. In certain circumstances, for example where a potential or unsettled credit event exists as at the Scheduled Settlement Date of the Securities or a resolution of a credit derivatives determinations committee is pending at such time, the settlement of the Securities may be postponed for a material period of time after the Scheduled Settlement Date.

Risks related to the market generally

- The investment activities of certain investors are subject to legal investment laws and regulations, or review or regulation by certain authorities.
- Issue price of the Securities include placement fees. The placement fees shall be paid by the Issuer to the Distributor. Any such fees may not be taken into account for the purposes of determining the price of such Securities on the secondary market and could result in a difference between the original issue price, the theoretical value of the Securities, and/or the actual bid/offer price quoted by any intermediary in the secondary market.
