**What are the key risks that are specific to the Issuer?**

The Issuer and Mediobanca Group is subject to the following key risks:

- the operations, earnings capacity and the stability of the sector of both the Issuer and the Mediobanca Group may be influenced by its credit standing, the general economic situation of the country of Italy and the entire Eurozone, trends on financial markets and the economic, social and financial consequences generated by the Covid-19 pandemic and the Russia/Ukraine conflict. With reference to financial markets, the solidity, resilience and growth prospects of the economies of the countries in which the Issuer operates in particular will be especially important. The macroeconomic scenario is currently marked by considerable uncertainty in relation to: (a) the Russian-Ukrainian conflict and recent developments in the Israeli-Palestinian conflict; (b) the long-term consequences of the health crisis due to the Covid-19 pandemic; and (c) the recent crisis in the international banking system, combined with restrictions imposed by jurisdictions to reduce persistent inflationary pressures, which have led to a slowdown in global growth.. In relation to point (a) above, the persistence of uncertainties linked to the Russian-Ukrainian conflict continue to generate strong tensions on the energy and commodities markets. In relation to point (b) above, in the 2022/2023 financial year, global economic growth was influenced by the Chinese government's decision to abandon the zero-tolerance policy towards Covid infections. As at 30 June 2023, adjustments to loans were equal to €270.1 million (compared to €242.6 million as of 30 June 2022) and that the Group's cost of risk was equal to 52bps (compared to 48bps as of 30 June 2022). In relation to point (c) above, any actions taken jointly by the main rating agencies and resulting in the rating for Italian sovereign debt being downgraded to below investment grade level could negatively impact the financial and economic situation of Mediobanca and the Group;
- the business activities of both Mediobanca and the Group and their earnings and financial solidity depend also on the credit standing of their respective clients and counterparties. Mediobanca is exposed to the risks traditionally associated with credit activity. Accordingly, breach by its customers of contracts entered into and their own obligations, or the possible failure to provide information or the provisions of incorrect information by them regarding their respective financial and credit situation, could impact negatively on the earnings, capital and/or financial situation of Mediobanca;

- as at 30 June 2023, the Issuers' capability to implement the actions and to meet the Plan Objectives contained in its 2023-26 Strategic Plan depends on a number of circumstances, some of which are beyond the Issuer's control, including, but not limited to, the macroeconomic scenario, which could be compromised by the consequences deriving from the Russia/Ukraine conflict, the changes in the regulatory framework, and the effects of specific actions or concerning future events which the Issuers are only partially able to influence. Furthermore, there is no certainty that the actions provided for in the Strategic Plan will result in the benefits expected from implementation of the Plan Objectives; if such benefits fail to materialize, the results expected by the Mediobanca may differ, even materially, from those envisaged in the Strategic Plan;
- the Issuer is subject to market risk, defined as the risk of the loss of value of the financial instruments, including sovereign debt securities, held by the Issuer as a result of movements in market variables (including, but not limited, interest rates, stock market prices and/or exchange rates) or other factors that could trigger a deterioration in the capital solidity of the Issuer and/or the Group. The financial year ended at 30 June 2023 has been characterized by a persistent volatility across all asset classes, especially interest rates, due primarily to the macroeconomic context, which has been characterised by a high inflation rate for the principal Western economies;
- the Group is exposed to different types of operational risk. The event types most impacted by operational risk are originated by products sold to clients, commercial practices, the execution of operating processes, and frauds committed from outside the Group. Although the Mediobanca Group has adopted a system for recording, assessing and monitoring operational risks with a view to preventing and containing them, it should be noted that unpredictable events or events otherwise beyond the control of the Issuer could occur, which could impact negatively on the Issuer's and the Group's operating results, activities and earnings, capital and/or financial situation, as well as on their reputation.

#### Where will the Securities be traded?

The Issuer reserves the right to make further applications for the Securities to be admitted to listing and/or trading on additional markets/trading venues.

#### What are the key risks that are specific to the Securities?

The Securities are subject to the following key risks:

##### General

- The Securities may not be a suitable investment for all investors. Investors should be aware that they may lose the value of their entire investment or part of it, as the case may be. An investment in the Securities, which are linked to the Underlying References, may entail significant risks not associated with investments in conventional securities such as debt or equity securities. Set out below is a description of the most common risks.

##### Risks related to the structure of a specific issue of Securities

- The Securities involve a high degree of risk, which may include, among others, interest rate, foreign exchange, time value and political risks. Investors should be prepared to sustain a partial or total loss of the subscription or purchase price of the Securities. Certain general risk factors related to the Securities referencing an Underlying Reference, including that the market price of the Securities may be volatile; that investors may receive no remuneration; that investors may lose all or a substantial portion of their principal in case of non-capital guaranteed Securities; that the Underlying References may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other securities or indices; that the timing of changes in an Underlying Reference may affect the actual yield to investors, even if the average level is consistent with their expectations; and Securities are of limited maturity and, unlike direct investments in a share, investors are not able to hold Securities beyond the Settlement Date in the expectation of a recovery in the price of the underlying.
- The Issuer may, but is not obliged to, list or ask for admission to trading of Securities on a stock exchange or a trading venue. If the Securities are listed or admitted to trading on any stock exchange or trading venue, there can be no assurance that at a later date, the Securities will not be delisted or that trading on such stock exchange or trading venue will not be suspended. The Issuer or any of its Affiliates may, but is not obliged to, be a market-maker for an issue of Securities. However, during certain periods, it may be difficult, impractical or impossible for the entity acting as market-maker to quote bid and offer prices. Even if the relevant Issuer or such other entity is a market-maker for an issue of Securities, the secondary market for such Securities may be limited.
- In case certain events, indicated in the terms and conditions and the relevant final terms, occurs with reference to the relevant

Underlying Reference(s) or the Securities, the Calculation Agent and the Issuer have broad discretion to make certain determinations to account for such event(s) including to (i) make adjustments to the terms of the Securities and/or (ii) cause early settlement of the Securities, any of which determinations may have an adverse effect on the value of the Securities. The effects of coronavirus pandemic (such as the measures taken by governments and authorities in this respect) may cause the occurrence of the events indicated above and involve such adjustments to the terms of the Securities and/or early settlement of the Securities.

- The Terms and Conditions of the Securities are based on English law in effect as at the date of the Base Prospectus, except for the status provisions applicable to the Securities and the contractual recognition of bail-in powers provisions, and any non contractual obligations arising out of or in connection with such provisions, which shall be governed by, and construed in accordance with, Italian law. No assurance can be given as to the impact of any possible judicial decision or change to English law or administrative practice after the date of the Base Prospectus.

#### **Risks relating to Underlying Reference Asset(s)**

- The occurrence of an additional disruption event or optional additional disruption event may lead to an adjustment to the Securities early settlement or may result in the amount payable on scheduled settlement being different from the amount expected to be paid at scheduled settlement and consequently the occurrence of an additional disruption event and/or optional additional disruption event may have an adverse effect on the value or liquidity of the Securities. In addition, the value of the Securities and the amount that Securityholders receive upon an Automatic Early Settlement may not correlate with the value of the Underlying Reference, which may trigger such Automatic Early Settlement.
- In addition to the credit risk of the Issuer, payments on the Securities are subject to the credit risk of the Reference Entity to which they are linked. Holders may lose their entire amount of principal invested and may not receive any payments of remuneration if Event Determination Dates occur. The financial condition and creditworthiness of a Reference Entity may change over time. Public information which is available in relation to a Reference Entity may be incomplete, misleading or out of date. The identity of each Reference Entity is subject to amendment as a result of corporate or other actions such as a merger or demerger. The risks associated with successor Reference Entity may be greater than the risks associated with the original Reference Entity. The credit risk to investors may further be increased if the Reference Entity and the Issuer are concentrated in a particular industry sector or geographic area, or if they have exposure to similar financial or other risks. Holders will have no claim against any Reference Entity and no interest in or rights under any obligation of a Reference Entity. An investment in the Securities is not equivalent to an investment in the obligations of a Reference Entity. The occurrence of a credit securities additional disruption event or a merger event may result in the Securities being settled prior to the Scheduled Settlement Date at their fair market value which may be an amount which is less than the outstanding notional amount of the Securities. Where settlement of the Securities following a Credit Event is determined by reference to a credit derivatives auction, the outcome of such auction may be affected by technical factors or operational errors or may be subject to actual or attempted manipulation, which may result in a lower payment to Holders. Where settlement is determined by reference to bid quotations sought by the Calculation Agent from third party dealers, the Calculation Agent will be entitled to seek quotations for eligible obligations of the relevant Reference Entity having the lowest possible market value. In certain circumstances, for example where a potential or unsettled credit event exists as at the Scheduled Settlement Date of the Securities or a resolution of a credit derivatives determinations committee is pending at such time, the settlement of the Securities may be postponed for a material period of time after the Scheduled Settlement Date.
